

Muhammad Samiullah Khan

MERN-Stack developer

Lahore, Pakistan

(+92) 3342323004

samikhan7816@gmail.com

Summery

As a self-taught MERN stack developer with over a year of focused learning experience, I continuously improve my abilities in the development ecosystem. And I bring a range of expertise to the table. Experience with MongoDB for stable database management and Express.js for designing solid server-side design. React to create dynamic and interactive user interfaces with Node.js for fast back-end development. Hands-on projects helped me improve my abilities in building and effectively applying complete online apps. They have the best API and provide reliable connection between server and client. My collaborative attitude and up-to-date knowledge of technology enable me to create new and scalable web solutions.

Projects

E-commerce site

*react.js,
Node.js, MongoDB
Github*

COLLECTION OF USERS PRODUCTS

- Crafted a single-page application with React.js and Node.js to facilitate the user of to get things
- Implemented static site generation for accelerated load times and increased efficiency.
- Used MongoDB database to store data and then fetch it for frontend for users.

Blogging site

*react.js,
Node.js, MongoDB
Github*

User can read and handle his Blogs

- After registering, users can create personal blogs, view blog data, upload blogs for other users, and read their blogs.
